I-Mix

12 Color Ink Mixing System

Now available for the IM-100, IM-200, and IM-400 Series of pad printing inks.

The I-Mix System is designed to allow simple in-house replication of the universal color references of the PANTONE 1000 Guide, plus additional colors widely used throughout the graphics industry.

The mixing system includes 9 pigmented blending colors in addition to white, black, and clear. Created for ease of use, the mixing system has the maximum opacity possible, while maintaining the integrity and cleanliness of the simulated shade once blended. The formulas have been created to deliver the desired shade using the fewest number of mixing components.

In addition to the I-Mix system, ITW Imtran offers a full line of ink mixing supplies including mixing buckets, stir sticks, viscosity spatulas, precision scales and other related items.

I-Mix
